

# Original Research: Challenges Faced by European Infosec Leaders

Cybersecurity threats continue to put European organisations of all sizes at risk. Infosec leaders face multi-pronged challenges, from mitigating the threats themselves to managing the budget for vital cybersecurity training.

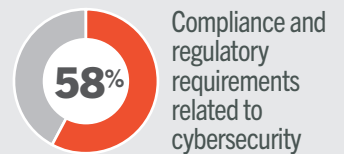

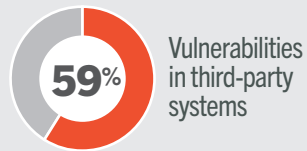

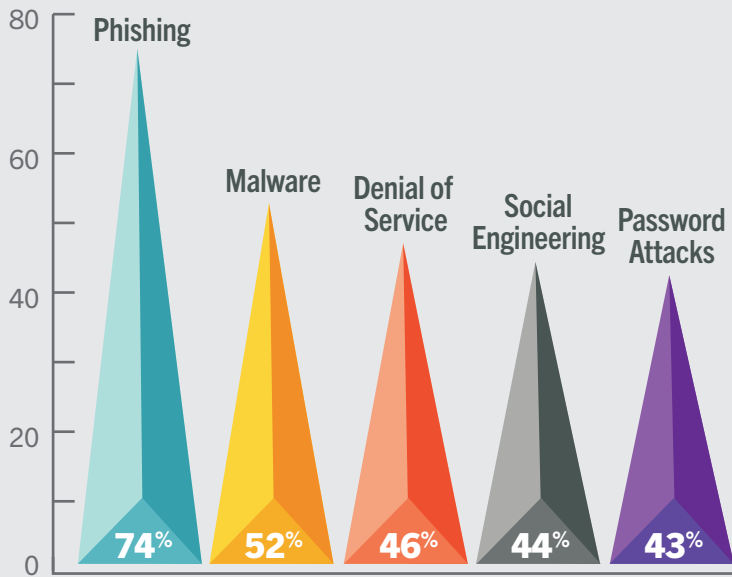

To investigate this issue further, KnowBe4 commissioned a study of 101 cybersecurity leaders across Belgium, Denmark, France, Italy, Luxembourg, Netherlands and Sweden to determine key challenges.

**Learn some key statistics highlighted from the original data below:**

## Phishing and Breaches Top Key Challenges

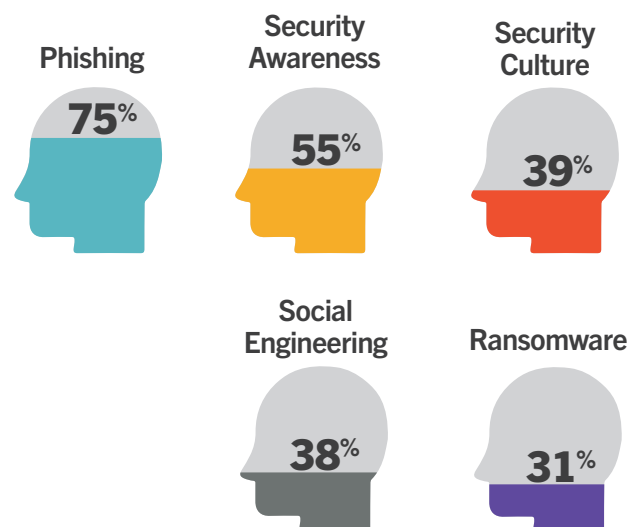

The majority of cybersecurity professionals reported cyber attacks had impacted their European locations.\*

Two-thirds of cybersecurity professionals indicated that a **lack of cybersecurity awareness and training for their employees** is a top challenge today.\*

## Security Awareness Training: How Much and What Organisations Want

Phishing and overall security awareness were the top cybersecurity topics of greatest importance to train employees on.\*

\*Percentages will equal more than 100% because respondents could choose all options that applied
