Security Awareness Training Software (*continued*)

Security Awareness Training Software Definition

G2 defines security awareness training as software that offers online courses or in-app training to train and assess end users' security readiness. Businesses use these tools to outsource security training to specialized providers with experience and courses specific to various security measures. Organizations also use these tools to meet internal security and privacy compliance standards and influence changes in behavior to reduce an organization's security risk.

Many of these tools deliver simulated attacks to help employees better identify malicious content before encountering it in real-life scenarios. These scenarios and training can sometimes be adapted to address different roles and risks within an organization. Some security awareness training includes content designed to inform users and help protect against security threats unique to AI, such as exercises to identify deepfakes or how to use AI responsibly in the workplace. New course content and simulations are often released in response to real-life scenarios and evolving threat landscapes.

An emerging function of security awareness training software is using AI to customize training programs. Customizations can automate content generation in alignment with an organization's policies and priorities or industry. AI can curate learning paths that align with an individual's specific learning needs based on past training or simulation performance.

Security awareness software is designed to train and support end users in all areas of an organization. This is different from [cybersecurity professional development software](#), which targets cybersecurity professionals to cultivate new technical skills or prepare for professional cybersecurity certifications.

To qualify for inclusion in the Security Awareness Training category, a product must:

- Offer online security classes, web-based educational content, or simulations for end users
- Provide assessment tools and monitor learning progress

(Security Awareness Training Software continues on next page)

Security Awareness Training Software (*continued*)

Security Awareness Training Grid® Scoring Description

Products shown on the Grid® for Security Awareness Training have received a minimum of 10 reviews/ratings in data gathered by April 28, 2026. Products are ranked by customer satisfaction (based on user reviews) and market presence (based on market share, seller size, and social impact) and placed into four categories on the Grid®:

Products in the Leader quadrant are rated highly by G2 users and have substantial Market Presence scores. Leaders include:

[KnowBe4 Security Awareness Training](#), [Hoxhunt](#), [Hornetsecurity Security Awareness Service](#), [SoSafe](#), [Arctic Wolf](#), [Adaptive Security](#), [MetaCompliance Security Awareness Training](#), [Huntress Managed Security Awareness Training](#), [Mimecast Security Awareness Training](#), [Infosec IQ](#), [Webroot Security Awareness Training](#), [Riot](#), [EasyLlama](#), [usecure](#), [IRONSCALES](#), [Immersive](#), [Phished](#), [NINJIO Security Awareness](#), and [Hornetsecurity 365 Total Protection](#)

High Performing products have high customer Satisfaction scores and low Market Presence compared to the rest of the category. High Performers include: [Hacker Rangers Security Awareness](#), [Guardz](#), [Boxphish](#), [Taliant](#), [CyberHoot Cybersecurity Awareness Training](#), [Beauceron Security](#), [Pistachio](#), [Right-Hand Cybersecurity](#), [Goldphish](#), [Trustifi Email Security](#), [Global Learning Systems](#), [Arsen](#), [Copla](#), [Carbide](#), [Bastion Technologies](#), [Junglemap](#), [Defendify All-In-One Cybersecurity Solution](#), [ProPHISH](#), [Phin Security Awareness Training](#), [Hook Security](#), and [cyberconIQ Cyber Awareness Training](#)

Contender products have relatively low customer Satisfaction scores and high Market Presence compared to the rest of the category. While they may have positive reviews, they do not have enough reviews to validate those ratings. Contenders include: [Proofpoint Security Awareness Training](#), [SANS Workforce Security and Risk Training](#), [BullPhish ID](#), [Barracuda Security Awareness Training](#), and [Symantec Email Security.Cloud](#)

Niche products have relatively low Satisfaction scores and low Market Presence compared to the rest of the category. While they may have positive reviews, they do not have enough reviews to validate those ratings. Niche products include: [Inspired eLearning Powered by VIPRE](#), [PhishingBox](#), [Fortra Human Risk Management](#), [CyberSmart](#), [CultureAI](#), [Nimblr Security Awareness](#), [Avatao](#), [CybeReady Security Awareness Training Platform](#), [OutThink Adaptive Security Awareness & Human Risk Management Platform](#), [Threatcop Security Awareness Training](#), and [Haekka](#)

Grid® Scores for Security Awareness Training Software

The table below shows the Satisfaction and Market Presence scores that determine product placement on the Grid®. To learn more about each of the products, please see the profile section.

Leaders

	# of Reviews	Satisfaction	Market Presence	G2 Score
KnowBe4 Security Awareness Training	2286	86	99	92
Hoxhunt	3658	97	77	87
Hornetsecurity Security Awareness Service	148	70	78	74
SoSafe	791	69	77	73
Arctic Wolf	103	61	82	72
Adaptive Security	75	69	64	67

Haekka	10	0	5	2

* Products are ordered by G2 Score. Satisfaction score is used as a tiebreaker if two products have the same G2 Score.

Grid® Methodology

Grid® Rating Methodology

The Grid® represents the democratic voice of real software users, rather than the subjective opinion of one analyst. G2 rates products from the Security Awareness Training category algorithmically based on data sourced from product reviews shared by G2 users and data sourced from third parties.

Technology buyers can use the Grid® to help them quickly select the best products for their businesses and to find peers with similar experiences. For sellers, media, investors, and analysts, the Grid® provides benchmarks for product comparison and market trend analysis.

Grid® Scoring Methodology

The Grid® Report for Security Awareness Training | Summer 2026 is based on reviews collected through April 28, 2026. We apply unique algorithms to this data to calculate Satisfaction (v4.0) and Market Presence (v7.0) scores for the Summer 2026 report quarter. To view the Security Awareness Training Grid® with the most recent data, please visit the [Security Awareness Training](#) page. For more details on Grid® Scoring, please view the [G2 Scoring Methodology](#) here.

Grid® Categorization Methodology

Making G2 research relevant and easy for people to use as they evaluate and select business software products is one of our most important goals. In support of that goal, organizing products and software companies in a well-defined structure that makes capturing, evaluating, and displaying reviews and other research in an orderly manner is a critical part of the research process.

To manage the process of categorizing the software products and the related reviews in the G2 community, G2 follows a publicly available [categorization methodology](#). All products appearing on the Grid® have passed through G2's categorization methodology and meet G2's category standards.

Many terms that appear regularly across G2 and are used to aid in product categorization warrant a definition to facilitate buyer understanding. These terms may be included within reviews from the G2 community or in executive summaries for products included on the Grid®. A [list of standard definitions](#) is available to G2 users to eliminate confusion and ease the buying process.

Rating Changes and Dynamics

The ratings in this report are based on a snapshot of the user reviews and third-party data collected by G2 up through April 28, 2026. The ratings may change as the products are further developed, the sellers grow, and as additional opinions are shared by users. G2 updates the ratings on its website in real time as additional data is received, and this report will be updated as significant data is received. By improving their products and support and/or by having more satisfied customer voices heard, Contenders may become Leaders and Niche sellers may become High Performers.

Trust

Keeping our ratings unbiased is our top priority. G2 follows defined community guidelines to ensure privacy, and authenticity for users and reviews. For more details, please view the [G2 Community Guidelines](#) here.

(Grid® Methodology continues on next page)

**** Net Promoter, Net Promoter System, Net Promoter Score, NPS and the NPS-related emoticons are registered trademarks of Bain & Company, Inc., Fred Reichheld and Satmetrix Systems, Inc.**

Grid® Methodology (*continued*)

Grid® Inclusion Criteria

All products in a G2 category that have at least 10 reviews from real users of the product are included on the Grid®. Inviting other users, such as colleagues and peers, to join G2 and share authentic product reviews will accelerate this process.

If a product is not yet listed on G2 and it fits the market definition above, then users are encouraged to [suggest its addition](#) to our [Security Awareness Training category](#).

Product Profiles

Product profiles and detailed charts are included for products with 10 or more reviews.

4.6 ★★★★★ (2,306)

KnowBe4 Security Awareness Training has been named a Leader based on receiving a high customer Satisfaction score and having a large Market Presence. KnowBe4 Security Awareness Training has the largest Market Presence among products in Security Awareness Training. 98% of users rated it 4 or 5 stars, 95% of users believe it is headed in the right direction, and users said they would be likely to recommend KnowBe4 Security Awareness Training at a rate of 93%.
