

TOP-CLICKED PHISHING TESTS

COMMON "IN THE WILD" ATTACKS

- ✔ HR: Your performance evaluation is due
- ✔ Google: You were mentioned in a document: "Strategic Plan Draft"
- ✔ IT: Inventory Form
- ✔ Microsoft 365: Microsoft 365 has new password requirements
- ✔ Amazon: Balance paid on your seller account
- ✔ Xerox: New document was processed for [[email]]
- ✔ Zoom: [[manager_name]] has sent you a message via Zoom Message Portal
- ✔ Facebook: Your recent Facebook login
- ✔ Your fax is pending for preview
- ✔ Money has been successfully withdrawn from your bank account

KEY TAKEAWAY

Business phishing emails are the most clicked subject category across the world. These range from messages purporting to be from internal organizational departments, to external requests for information that convey a sense of urgency and entice users to take an action.

TOP EMAIL SUBJECTS GLOBALLY

KEY TAKEAWAY

We have seen a lot more business related subjects coming from HR/IT/Managers in recent months. Others involve logins on new devices and password resets. These attacks are effective because they could potentially affect users' daily work, and cause a person to react before thinking logically about the legitimacy of the email.

Phishing Link Directs User to Data Entry or Login Landing Page

KEY TAKEAWAY

This is a ranking of top attack vector types used in KnowBe4 Phishing Security Tests. Unsurprisingly, the #1 vector for the past quarter from our phishing tests and those seen in the wild are phishing links in the email body. When these links are clicked they often lead to disastrous cyberattacks such as ransomware and business email compromise.
