# SecurityCoach

# **Sentinel**One<sup>•</sup>

KnowBe4's SecurityCoach integration with <u>SentinelOne</u> allows you to leverage security data for endpoint threats, malware, and more to send real-time SecurityTips to end users that put themselves and the organization at risk.

## The Problem 🚺

- Social engineering techniques like phishing, spear phishing, and impersonation are increasingly being used by cybercriminals to manipulate your employees, causing downtime and security breaches
- The human factor is involved in 82% of data breaches, according to the 2022 Verizon Data Breach Investigations Report
- The average SOC team receives an average of 11,000 alerts per day, resulting in alert fatigue and analyst burnout
- Users forget 50% of information they learn within one day and 90% within one week without engaging and frequent reinforcement of their training

### Managing the Problem

- You easily configure real-time coaching campaigns using your own security policies and the different categories of risky behavior
- SecurityCoach delivers the contextual, real-time SecurityTips you choose, using the ready-made graphic template library and optional custom notifications

#### Use Case Examples 📕

- Malware avoidance When SentinelOne detects Malware, SecurityCoach can map the malware to a specific user and send them a targeted coaching module on avoiding malware
- Ransomware avoidance When SentinelOne specifically detects ransomware, SecurityCoach can coach users on how to specifically avoid ransomware

# Benefits and Outcomes

- Measurable reduction in risk and a stronger security culture across your organization
- Improved comprehension and retention of your security awareness training, best practices, and established security policies
- Significant additional value from your existing investments in KnowBe4 and SentinelOne
- Time saved for SOC analysts and improved efficacy through automation and reducing alert noise caused by users repeating risky security behaviors

#### About KnowBe4 SecurityCoach

SecurityCoach enables real-time security coaching of your users in response to risky security behavior. Based on the rules in your existing security software stack, you can configure your real-time coaching campaign to determine the frequency and type of SecurityTip that is sent to users at the moment risky behavior is detected.

#### **About SentinelOne**

SentinelOne's cybersecurity solution encompasses AI-powered prevention, detection, response and hunting across endpoints, containers, cloud workloads, and IoT devices in a single autonomous XDR platform.
